DUAL SIM HOLDER PLATINUM, MINIATURE CONCENTRATE OF TECHNOLOGY

Epalinges, New York - 2009-10-21 - Dual SIM Holder Platinum, miniature concentrate of technology.

The Swiss Company Stancom announces the launch of its latest innovation on Dual SIM Holder *, the “Platinum”, a true innovative miniature concentrate of technology.

The new Platinum V7.0 differs from previous versions Black Silver Gold V6 presenting itself as a completely new hardware design and an innovative new software.

Hardware:

This Dual Sim Card was designed and developed with all the latest generation of semi-conductor, flexible printed circuit board technologies (CoF), and a high-capacity microcontroller Ultra thin chip melted into the mass.

The important thinness of the devise allows it to be inserted into all latest mobile phone generation such as Iphone, HTC, Nokia....that have a very thin SIM slot.

Rigid and flexible at the same time with its new hardware design, this Platinum model ensures a high reliability and is compatible with the latest mobile phones and SIM & USIM cards from all mobile operators.

Software:

Software side, Platinum has been developed to support 3G and HSDPA networks and guaranteed for the first time in Dual SIM Holder technology connections to 3G networks - UMTS - WCDMA - HSDPA (High Data transfer speed).

Thus, Platinum users can access the Internet and video telephony.

Integrating the functions of secret agenda, confidential directory, Platinum also embeds the encrypted SMS function to communicate via SMS in confidence.

The combination of quality materials and software, manufacturing quality and inspection requirement allows for the first time in Dual Sim area to go up a gear and to get 2 SIM cards in one mobile phone with all internet options enabled in the latest generation of mobile phones (Apple Iphone, Nokia E71, HTC Touch,
