Empire Medical Training visits many cities across the U.S. with Comprehensive Botox Cosmetic, Dermal Filler and the combination Comprehensive Botox/Dermal Filler 1-day Training seminars. The popularity of facial rejuvenation procedures is growing at a rapid rate with patients looking for these fast and immediate treatment options. Incorporate these procedures

immediately into an aesthetic practice and start administering Botox, Dermal Filler or other injectable fillers after obtaining Certification upon completion of any of these programs.

BOTOX® is the most common medical cosmetic treatment, with more than three million treatments performed each year. The botox injections are most often used for facial shaping to lift and shape the brow, and to soften or eliminate lines on the forehead. Some of the most commonly known uses for botox are crow's feet, frown lines, sad lines, lines under the eyes, bunny lines, dimpled chins, neck bands and necklace lines, drooping noses, bulging jaw muscles, and fine lines around the lips.

BOTOX® is a safe and effective treatment for the temporary reduction of moderate to severe facial lines and wrinkles. It is also used for excessive sweating disorders, muscle contraction, migraine headaches and as an effective and powerful medication in the treatment of many other health conditions. Patients are more likely to embrace injection procedures from their own physician if this opportunity is available.

Empire's hands-on programs provide the ability to use actual Botulinum Toxin (Botox) & Collagen products on live patients and as an added benefit bring along a test patient that would like to receive a free Botox, Reloxin or collagen filler treatment. These programs are scheduled on consecutive days for the convenience of the attendees to maximize the training experience.

[Empire Medical Training](#) has incorporated all the protocols and training of the new Reloxin product into Empire Comprehensive Botox Training programs. Reloxin will be available for use during the training program giving each attendee the opportunity to decide which product best suits the needs of individual practices. The option to use Dysport, Dermal Filler or other collagen products is also available.

Empire's expert physician staff of Board Certified Plastic Surgeons will work closely with each attendee to help ensure the attendee's technique in performing the various sculpting techniques is sufficient. Didactic instruction will cover client expectations, contraindications, techniques and protocols needed, along with contraindication and understanding potential risks and side effects. There will be an adequate amount of time devoted to pricing each procedure and specific marketing protocols to integrate these lucrative cash based procedures into an existing office setting.

The most recent news at Empire Medical Training is the introduction of the newest program available to physicians. Empire Medical Training has added the convenience to training programs with the newest concept in aesthetic procedure training. The [Private Aesthetic Training](#) is provided to the physician in the physician's own practice setting. Empire travels to the physician and provides training in the physician's office. The physician has the benefit of earning revenue while in training.
