Empire Medical Training seminars are available every month in a city near you providing continued education for

physicians and health care providers. Remaining one of the most popular cosmetic procedures Botox injections are quick to learn and effective for upper and lower facial wrinkles. Empire provides a Comprehensive Botox/Dermal Filler 1-day Training program that will give each attendee a thorough understanding of the different uses for Botulinum Toxin (Botox®) and the cosmetic applications with a few simple, but useful medical uses as well.

Empire Medical Training created this 1 day combination Botox/Dermal Filler workshop which is just a combined version of either of these individual workshops. The didactic material is unchanged and there is sufficient time to practice and become proficient in all the injection techniques. This program was simply created to offer a 1 day option rather than the 2 day program for those attendees with a time restricted schedule.

This program will provide the ability to use authentic Botulinum Toxin (Botox®), along with Restylane and other collagen products on live patients. As an added bonus bring along a test patient who would like to receive a free Botox or Filler treatment. Empire's staff will work closely with each attendee to help ensure the attendee's technique in performing the various sculpting techniques is sufficient. Didactic instruction will cover client expectations, contraindications, techniques and protocols needed, along with contraindication and understanding potential risks and side effects.

Empire Medical Training has incorporated all the protocols and training of the new Reloxin product into Empire's Comprehensive [Botox Training](#) programs. Reloxin will be available for use during the training program giving each attendee the opportunity to decide which product best suits the needs of individual practices.

Empire Medical Training is consistently adding new training programs that provide the newest techniques and procedures in fat injection/transfer/grafting, weight loss, anti-aging, and pain management along with cosmetic enhancement procedures. Empire provides hands-on training workshops for a variety of comprehensive procedures including Botox Cosmetic, Dermal Filler and Autologous Fat Transfer.

Empire Medical Training with Dr. Stephen Cosentino is an American based, nationally recognized CME Training Institution fully accredited to provide Surgical Workshops, Aesthetic Workshops, Pain Management Procedures, Liposuction, Mesotherapy, Cellulite, and Lipo Therapies providing further education in the medical industry for Physicians, Dentists, Nurses and Health Care Professionals.

The Newest concept for Aesthetic training is the Private Aesthetic Training program for details on this program or any other medical workshop contact Dr. Stephen Cosentino toll free at 1-866-333-6747 or at <http://www.empiremedicaltraining.com>
