Future dates, locations, & catalogs also available

Empire Medical Training provides surgical cosmetic procedure training with the use of Tumescent Anesthesia in the Tumescent Liposuction w/Laser Lipolysis (1064 Wavelength) 2 Day Practical training course, and Autologous Fat Transfer, Submental Liposuction and Tumescent Liposuction - Office Based training programs. Physicians learn to perform procedures through experience with Hands-On sessions being prepared to perform these procedures safely and effectively in an Office-Based setting.

Attendees receive thorough training in all aspects of [Tumescent Anesthesia](#) including Tumescent Solution, Dosages and Concentrations for various body areas and genders. Liposuction, including tumescent techniques and Laser Assisted Lipolysis procedures are expected to increase in popularity due to the safe, effective, and satisfying results for patients with little or no down time following these procedures.

The 2-Day Hands-On Course will prepare attendees to perform both [Tumescent Liposuction](#) and Laser Lipolysis procedures using the 1064 wavelength that is the standard for body sculpting in conjunction with liposuction, these procedures are performed safely and effectively in an Office-Based setting. Laser Assisted Lipolysis helps to liquefy the fat as well as tissue tightening that is not possible with tumescent liposuction only. With Empire Medical Training programs learning Tumescent Anesthesia, Tumescent techniques, and Laser Lipolysis can prove to be a significant benefit in the financial department of any existing practice.

Attendees will receive thorough training in all areas of Tumescent Anesthesia, while working closely alongside a cosmetic surgeon at the surgery center. Attendees will also receive a thorough knowledge and understanding through lectures, didactic presentations and through a 300 page comprehensive manual which will enable the physician to immediately incorporate these procedures within their aesthetic practice. Learn to create a surgical suite within an office with the Standard of Care that insures the highest quality and safety for patients as well as protecting the physician performing these procedures.

[Autologous Fat Transfer](#)

(AFT) is a great income generator as well and considered to be the ideal filler for patients and physicians. Autologous fat costs nothing for the raw materials and has a minimal cost to harvest and prepare for re-injection. Submental Liposuction is safely and effectively performed in the office setting providing dramatic results for select patients. This is a procedure that can be done in the office in 30 minutes or less with little or no side effects.

Empire Medical Training is consistently adding new training programs that provide the newest techniques and procedures in fat injection/transfer/grafting, hCG weight loss, anti-aging medicine, Mesotherapy and pain management along with cosmetic laser procedures. Empire provides hands-on training workshops for a variety of comprehensive procedures including Botox Cosmetic, Dermal Filler and Facial Aesthetics.

Empire has new and exciting training concepts for 2010 and the newest is the Aesthetic Fast Track program which is a multiple events seminar that will provide a week of courses to jump start an Aesthetic practice beginning October 4-8 in Fort Lauderdale, FL. Empire will soon make the addition of Colonoscopy training with new and innovative techniques so

check for future course dates and locations on this exciting new workshop.

Learn aesthetic procedures without leaving the office with the Private Aesthetic Training program for details on this program or any other medical workshop contact Dr. Stephen Cosentino toll free at 1-866-333-6747 or at <http://www.empiremedicaltraining.com>
